

Dry ICE

4 COCKTAILS & DRINKS

4 Cocktails & Drinks

Add a touch of magic to your cocktails _____

Whether you are a bar tender, caterer or a cocktail guru who would like to impress guests with exceptional cocktails at your party, Dry Ice 4 Cocktails will allow you to serve drinks which are the talk of the town. Simply insert a dry ice pellet into a reusable swizzle stick and place it into the cocktail - enjoy the mesmerising effect of a stream of bubbles rising to the surface and bursting into wispy tendrils of smoke.

What is in the box? _____

Dry Ice 4 Cocktails comes as a handy kit consisting of 10 reusable swizzle sticks and 5 kg of 16 mm dry ice pellets, sufficient for approximately 50 cocktails. A protective glove is also included to prevent any adverse handling incidents, all neatly packaged in a polystyrene container. Additional swizzle sticks or dry ice pellets may be purchased in order to replenish your supply, during periods of high demand.

Where can I buy Dry Ice 4 Cocktails kits? _____

Handy kits may be obtained 7 days a week from your nearest Dry Ice retailer, or directly from our factory outlets in Pretoria, Cape Town, Durban and Port Elizabeth. Should you be catering for a larger clientele and require more substantial quantities, please contact our friendly staff members who will be able to assist you.

How do I store Dry Ice 4 Cocktails?

Our polystyrene packaging is designed to minimise sublimation during storage and is the best solution to store any left-over Dry Ice. Do not store Dry Ice in a airtight container, as it will sublimate and eventually expand, therefore building up pressure if not vented.

What about safety of Dry Ice 4 Cocktails?

Not suitable for human consumption - use the swizzle sticks provided.

Do not swallow - seek medical attention immediately.

Handle with protective gloves or mitts.

Transport in complete isolation from the driver.

Do not allow children to handle without adult supervision.

HOW DO I STORE DRY ICE?

Use an insulated cooler or polystyrene container. We can supply you with the perfect size polystyrene container, or you can wrap the dry ice in paper or a blanket to extend the life even further if necessary. Remember, do not store dry ice in your freezer at home!

WHAT ABOUT SAFETY?

Dry ice is not for human consumption. Handle it only with protective gloves or mitts. Transport only in complete isolation from the driver. Do not place dry ice in any gas-tight container. It sublimates and expands! Keep dry ice away from children (adult supervision is required).

WHAT is DRY ICE?

It is frozen carbon dioxide (CO₂), which remains at -79 °C. It is a non-toxic, non-flammable food-grade product, which sublimates from a solid directly to a gas - no liquid or water is left behind. The sublimation creates the cooling effect. The energy value of dry ice is 570 kJ/kg.

DELIVERY

Dry Ice International carries out dry ice deliveries countrywide on a 24-48 hour basis. Dry ice may be ordered on our website and be delivered to your doorstep. Dry ice can also be collected at any of our retail outlets.
